

Message from Executive Director

Welcome and thank you for visiting the website of the Geriatric Education and Research Institute (GERI).

GERI was set up in 2015 as a national entity under Singapore's Ministry of Health (MOH), to strengthen geriatric education, research and service planning in the health services and clinical aspects of ageing.

As we move forward, GERI will be focusing on three translational themes:

- Extending Healthspan
- Ageing in Place
- Advancing Care

We invite interested investigators from the Regional Health System (RHS) and academia to join us as faculty or collaborators in our continued efforts to develop interventions, programmes and policies that will encourage older adults to stay fit, healthy and active in Singapore. Participation of research faculty, postdoctoral fellows and students are also welcomed.

- A/Prof Ding Yew Yoong
